

Sustainable Design & Packaging (C6.1)

The Sustainable Design & Packaging (C6.1) seminar reviews the life cycle of industrial products, current product & packaging design & development, factors that determine it, the environmental & social impacts they cause, & finds sustainable alternatives.

Benefits

This seminar will enable you to:

- Understand the drivers for environmental & sustainable design
- Assess the environmental & sustainability impacts of products
- Integrate environmental & sustainable design into the design process
- Innovate through environmental & sustainable design.

Speakers

Speakers are chosen from among:

- Tom Bramley
- Prof. Martin Charter
- Edwin Datschefski
- Prof. Ross King
- Dr. Matthew Simon
- Prof. Frank Worsford
- Company Speakers (arranged 12 weeks before seminar)

Times

The seminar assembles at 08:30 am for a 9:00 am start each day and finishes at approximately 5:30 pm. The seminar is intensive, please be prepared for evening sessions.
